

SIGNUM PRO *S-6700 Professional*

Using the newest techniques and own CAD engineering we have developed these exceedingly well manufactured stringing machines which are also extremely good value.

- **Computerized**, electronic stringing system for professional users.
- New developed **linear pulling tension head** for very comfortable and fast stringing, including new **longlasting string gripper**, made of **hardened steel**.
- Very exact **tension adjustment in steps of 0,1 kg/lb** from 4,5-40,8 KG or 10-90 LB using high accurate sensors.
- New **high resolution LCM-screen** and **big keypad** with **many special functions** as constant pull, pre stretch, various stringing speed, various memory keys, knot, sound and more.
- **Fast pull switch** on the gripper for one hand use.
- 6-point **self centering mounting system** for all racket sizes, also frames for squash and badminton.
- each **2 arms**(with side supports) of 1 center tower and **both center towers**(with center supports) together can be moved and fastened **simultaneously and symmetric** by turning only 1 center knob.
- **High quality swivel clamping system** with **diamant dust coated inlays** for perfect grip without damages, furthermore an **auto relase locking system** of clamp base. The locked clamp base release automatically if you let fall down the upper part off he clamp.
- **curved clamp trails**.
- **Turntable can be locked**.
- **Big tool tray**
- Available as **desktop or stand machine**, stand machine is height adjustable and has a string reel holder.
- Because of an automatic adapting transformer it can be used at a power supply of 100-240 V AC, important for travels to other countries.
